January 2012 Highlights

Mercury is in the Eastern sky before sunrise. Look for it to rise around 5:30am the first week of January.

Venus will be visible for about 2 hours after the sun sets. Look for this bright beacon in the west in the early evening.

Mars rises around 9:30pm in the East. Look for it in the constellation of Leo the Lion.

Jupiter is visible in Pisces. Look for it high overhead in the south at sunset, it will set shortly after midnight.

Saturn rises around 1am in the Eastern sky and is visible in Virgo.
